# COMPASS PEA

Compass Peas are a short season spring pea that offers the grower great forage yield, while replenishing nitrogen to the soil. Compass peas can be grazed, or hayed. Plant compass peas in a mix and watch your herd benefit from this added species to their diet.

## Key Features

- Aggressive growth, ideal for boot stage blends or an early maturity soft dough crop
- White flowered for better palatability and digestibility
- Higher seed yield
- Normal leaf type pea
